

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

**VENEZUELA.****CARACAS—Plague and Yellow Fever.**

Chargé d'Affaires Whitehouse reported March 18 to the Department of State the occurrence of 3 cases of yellow fever at Caracas from February 15 to March 4 and 3 cases from March 4 to 11.

On April 8 the American consul general reported a case of plague at Caracas.

**ZANZIBAR.****ZANZIBAR—Smallpox—Examination of Rats.**

Consul Weddell reports March 4:

From February 6 to 20 there were reported 3 new cases of smallpox, with 1 death. The total number of cases of smallpox reported from June 8 to February 26 was 260, with 141 deaths. The total number of persons vaccinated during the same period was 36,340.

During the three weeks ended February 28 there were examined for plague infection 2,272 rats. No plague-infected rats were found.

**CHOLERA, YELLOW FEVER, PLAGUE, AND SMALLPOX.****Reports Received During Week Ended April 14, 1911.**

[These tables include cases and deaths recorded in reports received by the Surgeon General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State, and from other sources.]
